Data analytics professional with a Master of Business Analytics (Monash University, Australia) and dual professional accreditation — Graduate Statistician (GStat) and Associate Certified Analytics Professional (aCAP). Skilled in R, SQL and Python, with hands-on dashboard and reporting experience in Power BI and Tableau. Delivered statistical modelling, data pipeline, and visualisation work across hospital and academic research settings, including sole ownership of an end-to-end clinical dashboard project. Seeking a Data Analyst, Data Scientist, Business Analyst, or Product Analyst role in Singapore, Malaysia, or Thailand where analytical rigour and clear stakeholder communication can drive better decisions.

Key Skills Summary

- **Analytics & Programming:** R (expert), SQL, Python
- **Visualisation & BI Tools:** Power BI, Tableau
- **Methods:** Statistical modelling, Machine Learning, Data wrangling & cleaning, Dashboard development
- **Domain Knowledge:** Healthcare & clinical data, Financial services, Research compliance & ethics
- **Soft Skills:** Cross-functional collaboration, Stakeholder communication, Ad-hoc analysis, Report writing

Education

Monash University (Melbourne, Australia)
Master of Business Analytics
WAM 68.94

Mar 2022 - Jun 2024

Maejo University (Chiang Mai, Thailand)
Bachelor of Economics (International Economics)
GPA 3.72

Jun 2017 - Apr 2021

Relevant Professional Experience

Srinagarind Hospital (Khon Kaen, Thailand)

Jan 2025 - Present

Volunteer Data Analyst (Remote)

- Built a patient data entry platform and interactive dashboards for a hypertension clinic, enabling clinicians to make faster, evidence-based decisions.
- Migrated legacy patient records to a new system using advanced data cleaning and wrangling techniques in R, reducing data errors and improving record accuracy.
- Applied statistical modelling to support clinical research, improving health outcome predictions and supporting publication-ready analysis.
- Collaborated with a multidisciplinary medical team to design data pipelines and visualisations, responding to ad-hoc analysis requests from clinicians on demand.

Monash University & Alfred Health (Melbourne, Australia)

Aug 2023 - Oct 2023

Research Assistance (Internship)

- Conducted end-to-end data analysis for a healthcare research project, handling sensitive and protected patient data in compliance with strict ethical guidelines.
- Designed and applied data cleaning workflows that significantly improved dataset accuracy and reliability, enabling robust downstream analysis.
- Collaborated with researchers to build visualisations and analytical reports, contributing findings that were presented to the wider research team.

W Melbourne, Pullman Hotel & D'elephant Thai Richmond (Part-time, Australia)

Mar 2022 - Jul 2026

Hospitality Roles (Part-time)

- Undertaken part-time alongside active job searching for data roles and ongoing volunteer analytical work.
- Led and supervised the turn-down service team at W Melbourne, trained new staff, and inspected rooms for quality standards
- Delivered 5-star service across housekeeping and front-of-house functions in fast-paced, internationally recognised venues.

Muang Thai Life Assurance Public Company Limited (Chiang Mai, Thailand)

Jun 2021 – Jan 2022

Life planner

- Analysed client financial profiles and recommended tailored life, health, and investment insurance products aligned to each client's goals and risk appetite.
- Applied negotiation and interpersonal skills to build long-term client relationships, resolving complex enquiries and managing client expectations.
- Contributed to a team sales performance that exceeded targets by 15% through consistent data-driven client matching and relationship management.
